

## Alex's Lemonade Stand Pond Tour 2010

Bucks and Montgomery Counties:

### **Suggested Route:**

1054 Horsham Road  
North Wales, Pa. 19454  
The office of Cedar Run Landscapes  
Hosted by the employees of Cedar Run

More than 13 water features of every style are here to delight you. Multiple cascading streams, ponds, Pondless waterfalls, bubbling rocks, basalt column sets and gracefully cascading urns will keep the visitor entranced. Our multiple features have been developed and fine tuned over the past 5 years to provide a showplace for the builders' skills. There are up well biofiltration systems, negative edge waterfalls, and other special features too numerous to mention. The landscaping that surrounds the water gardens hints at the origin of Cedar Run as a full service design, installation and landscape maintenance company. Again, look for the theme of the day repeated in the colors of many of the perennials and shrubs that are used. Cedar Run is most proud of the Rainwater Harvesting and re-use system that was created in August of 2008. This system is replete with a natural stone permeable patio that is constructed over a 3000 gallon storage system. A raised, up well biofiltration system is at the headwaters of a 10 foot stream that flows gracefully back down onto the patio, and disappears amongst the stones. If you approach quietly, you may have a chance to enjoy the multiple birds that visit for their drinks and baths. The overflow from the cistern is released into a rain garden that is planted with moisture tolerant native shrubs and perennials. A fire pit, sitting area and wildlife friendly plantings adorn the patio. We are excited to have you here to view this feature, which by accessing the stored rainwater, has reduced our use of public water by over 45%.

John & Cecelia Zbyszinski  
117 Winter Drive  
North Wales, PA 19454  
Hosted By The Zdyszinski Family

Two water features were built in the summer of 2008 at this lovely North Wales colonial home. As you approach from the street you will first be greeted by a large Pondless waterfall that features two streams cascading down native granite waterfalls into the basin. The feature is planted with lush perennials and shrubs, providing four seasons of interest. The homeowners are gardeners themselves, and with the help of Cedar Run, have created a welcoming front entranceway feature that includes plants, water, and garden lighting.

As you wander down the driveway towards the rear yard, you will begin to hear the sounds of a more discreet and private water feature. Tucked into a small cove in the rear

yard is a single stream Pondless waterfall with lush plantings surrounding. It is enjoyed from the rear porch of the home, and adds a new dimension to the homeowners more private garden space. This feature was also installed with garden and in water lighting in the summer of 2008.

Mr. & Mrs. Scott McFarland  
104 Amber Place  
North Wales, Pa. 19454  
Hosted by the McFarland Family

Please enter the rear yard from the left hand side of the property walking on the lawn. Designed and installed by Cedar Run Landscapes in the fall of 2007, this outdoor entertainment space includes a large paver patio with sitting walls and landscape lighting, along with a lovely ecosystem pond being fed by a waterfall and 10 foot stream. The family spends many hours enjoying their fish as they glide thru the water and hide among the many water plants and rock crevices of the pond. There are many trees, flowering shrubs, perennials and ground covers to enjoy, along with a nice display of annual flowers that fills in gaps in the blossoming of the other plantings. The McFarland's property shows a good range of the services that Cedar Run provides, including lawn care, garden maintenance, landscape lighting, water feature creation and hardscape installation.

D'Elia Residence  
113 Independence Way  
Chalfont, PA 18914  
Hosted by Anthony D'Elia

In the front yard of the D'Elia residence enjoy a beautiful 15 foot pondless waterfall that is powered by a 4500 gallon per hour pump that cascades and collects into a 1500 gallon intake reserve. This water feature is not only beautiful to look at, it also provides the peaceful sound of rushing water that not only can be enjoyed by the D'Elia family but also his neighbors.

584 Maple Ave  
Doylestown, PA 18901  
Hosted by Christian & Diane Baker  
Owners of James Ponds

You'll be amazed by what you find here. Nestled in this backyard borough home is a wonderful getaway. Walk across the lawn to find a beautiful 6 x 8 pond tucked into a shady corner just outside the Baker's family room. This little beauty, surrounded by hosta's , astilbe, ghost ferns and a selection aquatic plants is just the beginning, continue through the gate to enter a backyard vacation getaway. The pride and joy of this retreat is

the 18 x 30 eco system pond with 16 ft stream and waterfall, tucked between the house and pool. The pond also boasts a beautiful bog garden waterfall. Over 45 tons of boulders were used for the pond and garden walls in the creation of this oasis. Be sure to check out the variety of aquatic plantings in the bog and in the pond, from the blooming lilies, the various carnivorous pitcher plants, to the red swamp milkweed (host plant to the monarch butterfly) and much more. You'll love the way the fish chase you looking for a nibble of food. Don't miss the small ceramic fountain feature nestled beside the pool. **Feel free to have a seat and enjoy a light snack, which will be available while enjoying the garden, which was begun two summers ago.** While still in the "infancy" stages this garden has a wide variety of plantings, which will continue to be expanded on. We look forward to inviting you back year after year to see the changes.

529 Caddy Drive  
Doylestown, PA 18901  
The Anderson Residence

You'll be awed by the dramatic entranceway to this beautiful home. This 15 ft pondless waterfall was installed by James Ponds in June of 2009 and is nestled in amongst mature shrubs and perennials. The challenge here was the steep hillside directly next to their stairs. It was used to the best advantage to create great drops, which create an amazing sound to welcome the Andersons and all their guests. The Andersons have a wonderful curbside appeal and is a must see for great ideas.

Warrington Township Building  
852 Easton Road  
Warrington, PA 18976

At the entrance to the township building is a decorative urn built on "EARTH DAY" 2010. Underneath this beautiful flowing urn is a 250 gallon basin that is used to collect and reuse the rainwater from a 1000 square foot area of shingled roof surface. Not only does it look great at the entrance of this building it truly is an excellent example of sustainable water feature .

Blase Residence  
919 Phillips Drive  
Warminster, PA 18974  
Hosted by Gerry Blasé

This once in-ground swimming pool now transformed into an amazing, fully functional Pondless waterfall completely turned this ho-hum back yard into a private back yard paradise! The Pondless waterfall is powered by 2 pumps that run the waterfall and then split into twin streams rushing along the outside of a main sitting area with fire pit before

rejoining into one stream and then crashing into the intake bog . This water feature is perfect for relaxing and entertaining regardless the occasion or time of year!

Noga Residence  
2189 Green Ridge Road  
Warrington, PA 18976  
Hosted by Rick Noga

This Pond is the perfect pond for any back yard. Set alongside the deck for easy viewing and relaxing and perfect for the kids to play and interact. This pond features an inpond bog and waterfall powered by a 3000 per gallon pump .

Steigerwalt Residence  
1268 Holly Drive  
Warrington, PA 18976  
Hosted by Tim Steigerwalt

In the back yard of the Steigerwalt residence is an awesome Pond with a waterfall, 8 foot stream, and 2 air rassing pumps set right up against the patio. The waterfall is run by a 7500 gallon per hour pump set inside an inpond bog that runs up and out of the biofalls box crashing down back into the pond. Both air rassing pumps also sit inside the inpond bog run by 2000 gallon per hour pumps and not only provide aeration for the pond but also attract the fish to certain areas of the pond for easy viewing and feeding .

Lentzcaping, Inc.  
2139 Bristol Road  
Warrington, PA 18976  
Hosted by Al Lentz, Steve Happ and their employees

Your final destination on our pond tour is Lentzcaping, Inc! Lentzcaping has 10 distinct water features on display for your viewing pleasure, from bubbling urns, to pondless waterfalls to entry level ponds and of course our main attraction pond that hold and filtrates 11,000 gallons of water.

Our main pond not only is beautiful and holds over 100 Kio, it also collects, stores and reuses all the rainwater coming from our main office building. Last year alone, we have collected and reused in excess of 60,000 gallons of rainwater, thanks to our rain exchange system. This pond is constructed for interaction; built with large boulders and rock for easy access and viewing. Please feel free to feed the fish (they will eat right out of your hand) and don't forget the main patio area, accompanied by a fire pit, fountain rock with permeable pavers and our outdoor kitchen.
